

# Travel Places

A map to record places have been visited.

Link: [https://nealxun.github.io/TravelPlaces/travel\\_places.html](https://nealxun.github.io/TravelPlaces/travel_places.html)

Update Note: 1. push pictures and updated csv file to the remote first, then push the md file and html file.  
2. to be safe, looks like each update needs at least two commits.

How to publish html pages (view html file) on GitHub

Settings -> GitHub Pages -> Source -> select master branch -> click save

Then you are able to view the rendered html file, e.g. [nealxun.github.io/repo/file](https://nealxun.github.io/repo/file).
